## Product fiche pursuant to Delegated Regulation (EU) no. 1061/2010

Model  Rated category in kg for the standard 60 degree cotton programme at full load or the 8 kg  A0 degree programme at full load whichever is the lower  Energy efficiency class  EU Ecolabel (if applicable)  Y  Weighted annual Energy consumption in kWh per year. "Energy consumption x kWh  But Ecolabel (if applicable)  Y  Weighted annual Energy consumption in kWh per year. "Energy consumption x kWh  But Ecolabel (if applicable)  Y  Weighted annual Energy consumption with the consumption of the low- power modes. Actual energy consumption will depend on how the appliance is used."  Energy consumption of the standard 60 degree cotton programme at full load and partial load of the standard 40 degree cotton programme at partial load  Weighted annual water consumption (AW C) in litres per year. "Water consumption  X litres per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees at full and partial load. Actual water consumption will depend on how the appliance is used."  Weighted annual water consumption (AW C) in litres per year. "Water consumption  X litres per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees at full and partial load. Actual water consumption will depend on how the appliance is used.  Spin-drying efficiency class. "Spin drying efficiency class X on a scale from G (least efficient) to A (most efficient)"  Maximum spin speed attained for the standard 60 degree cotton programme at full load or the standard 40 degree cotton programme at partial load, whichever is lower.  Actual consumption and the "standard 60 degree cotton programme at partial load, whichever is lower.  Indication that the "standard 60 degree cotton programme at partial load, whichever is lower.  Weighted annual water consumption will depend on how the standard 40 degree cotton programme at partial load, whichever is lower.  The programme are the standard 60 degree cotton programme at partial load and 40 degree cotton programme at partial load, whic	Washing Machine	Answer
Rated category in ke for the standard 60 degree cotton programme at full load or the 40 degree programme at full load whichever is the lower  Energy efficiency class  A+++  EU Ecolabel (If applicable)  Weighted annual Energy consumption in kWh per year. "Energy consumption x kWh per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 10 and partal load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used"  Energy consumption of the standard 60 degree cotton programme at full load and partal load, and partal load, and partal load, and partal load and partal load and partal load of the standard 40 degree cotton programme at partial load  Weighted power consumption of the off-mode and of the left-on mode  Weighted annual water consumption (AW C) in litres per year. "Water consumption  X litres per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 10 and partal load. Actual water consumption will depend on how the appliance is used  Splin-drying efficiency class. "Spin drying efficiency class X on a scale from G (least efficient) to A (most efficient)"  Remaining moisture content attained for the standard 60 degree cotton programme at full load or the standard 40 degree crotton programme at partial load, whichever is lower.  Remaining moisture content attained for the standard 60 degree cotton programmes to which the information within the label & fiche relates, that these programmes to which the information within the label & fiche relates, that these programmes are suitable to clean normally solide cotton laundy and the year the most efficient programmes in terms of combined energy and water consumption  The programme time of the "standard 60 degree cotton programme" at full load programmes are suitable to clean normally solide cotton laundy and the year the most efficient programmes are suitable to clean normally solide cotton laundy and the year the most efficient programmes are suitable to		
Energy efficiency class  EU Ecolabel (if applicable)  Weighted annual Energy consumption in kWh per year. "Energy consumption x kWh per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees and 40 apartal load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used"  Energy consumption of the standard 60 degree cotton programme at full load and partal load of the standard 40 degree cotton programme at partial load  Weighted power consumption of the off-mode and of the left-on mode  Energy consumption of the standard 60 degree cotton programme at partial load  Weighted annual water consumption (AW C) in litres per year. "Water consumption  X litres per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees at full and partial load. Actual water consumption will depend on how the appliance is used  Spin-drying efficiency class. "Spin drying efficiency class X on a scale from G (least efficient) to A (most efficient)"  Maximum spin speed attained for the standard 60 degree cotton programme at full load or the standard 40 degree programme at partial load, whichever is lower.  Maximum spin speed attained for the standard 60 degree cotton programme at full load or the standard 40 degree cotton programme at partial load, whichever is greater  Indication that the "standard 60 degree cotton programme at partial load, whichever is greater  Indication that the "standard 60 degree cotton programmes are suitable to clean normally solled cotton laundry and they are the most efficient programmes to which the information in the label & fiche relates, that these programmes are suitable to clean normally solled cotton laundry and are the most efficient programmes are suitable to clean normally solled cotton laundry and are the most efficient programmes are suitable to clean normally solled cotton laundry and are the most efficient programmes are suitable to clean normally solled cotton laundry an	Model	WAT24421GB
Weighted annual Energy consumption in kWh per year. "Energy consumption x kWh per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used"  Energy consumption of the standard 60 degree cotton programme at full load and partial load of the standard 40 degree cotton programme at partial load  Weighted power consumption of the off-mode and of the left-on mode  Weighted annual water consumption (AW C) in litres per year. "Water consumption X litres per year, based on 220 standard washing cycles for cotton programmes at 60 (Januam): 9680  Weighted annual water consumption (AW C) in litres per year. "Water consumption X litres per year, based on 220 standard washing cycles for cotton programmes at 60 (Januam): 9680  Weighted annual water consumption (AW C) in litres per year. "Water consumption X litres per year, based on 220 standard washing cycles for cotton programmes at 60 (Januam): 9680  Water consumption annual (Ja		8 kg
Weighted annual Energy consumption in kWh per year. "Energy consumption x kWh per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used"  Energy consumption of the standard 60 degree cotton programme at full load and partial load of the standard 40 degree cotton programme at partial load  Weighted power consumption of the off-mode and of the left-on mode  Weighted annual water consumption (AW C) in litres per year. "Water consumption Klitres per year, based on 220 standard washing cycles for cotton programmes at 60 degrees at full and partial load. Actual water consumption will depend on how the appliance is used  Spin-drying efficiency class. "Spin drying efficiency class X on a scale from G (least efficient) to A (most efficient)"  Maximum spin speed attained for the standard 60 degree cotton programme at full load or the standard 40 degree programme at partial load, whichever is lower.  Remaining moisture content attained for the standard 60 degree cotton programme at full load or the standard 40 degree cotton programme at partial load, whichever is greater  Indication that the "standard 60 degree cotton programme are suitable to clean normally solled cotton laundry and water consumption  The programme time of the "standard 60 degree cotton programme" are the standard washing programmes to which the information within the label & fiber relates, that these programmes are suitable to clean normally solled cotton laundry and water consumption  The programme time of the "standard 60 degree cotton programme" at full and partial load and the "stand 40 degree cotton programme" at partial load in minutes efficient programmes in terms of combined energy and water consumption  The programme time of the "standard 60 degree cotton programme" at partial load in minutes efficient programmes as in terms of combined energy and water consumption.  The	Energy efficiency class	A+++
per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used."  Energy consumption of the standard 60 degree cotton programme at full load and partial load of the standard 40 degree cotton programme at partial load.  Weighted power consumption of the off-mode and of the left-on mode  Weighted annual water consumption (AW C) in litres per year. "Water consumption X litres per year, based on 220 standard washing cycles for cotton programmes at 60 (Januum): 9680  Weighted annual water consumption (AW C) in litres per year. "Water consumption will depend on how the appliance is used  Spin-drying efficiency class. "Spin drying efficiency class X on a scale from G (least efficient) to A (most efficient)*  Maximum spin speed attained for the standard 60 degree cotton programme at full load or the standard 40 degree programme at partial load, whichever is greater  Indication that the "standard 60 degree cotton programme" and the "standard 40 degree cotton programme" are the standard washing programmes to which the information within the label & fiche relates, that these programmes are suitable to clean normally solled cotton laundry and they are the most efficient programmes to which the information within the label & fiche relates, that these programmes are suitable to clean normally solled cotton laundry and they are the most efficient programmes to which the information within the label & fiche relates, that these programmes are suitable to clean normally solled cotton laundry and they are the most efficient programmes to which the information in the label relates. These programmes are suitable to clean normally and they are the most efficient programmes in terms of combined energy and water consumption.  The programme time of the "standard 60 degree cotton programme" at full and partial load and the "standard 60 degree cotton programme" at full	EU Ecolabel (If applicable)	Υ
Weighted power consumption of the off-mode and of the left-on mode  Weighted power consumption (AW C) in litres per year. "Water consumption  X litres per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees at full and partial load. Actual water consumption will depend on how the appliance is used  Spin-drying efficiency class. "Spin drying efficiency class X on a scale from G (least efficient) to A (most efficient)  Maximum spin speed attained for the standard 60 degree cotton programme at full load or the standard 40 degree programme at partial load, whichever is lower.  Remaining moisture content attained for the standard 60 degree cotton programme at full load or the standard 40 degree cotton programme at partial load, whichever is greater  Indication that the "standard 60 degree cotton programmes to which the information within the label & fiche relates, that these programmes are suitable to clean normally solied cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption  The programme time of the "standard 60 degree cotton programme" at full and partial load and the "standard 60 degree cotton programme" at partial load in minutes efficient programmes in terms of combined energy and water consumption  The programme time of the "standard 60 degree cotton programme" at partial load in minutes efficient programmes in terms of combined energy and water consumption.  Programme time of the "standard 60 degree cotton programme" at partial load in minutes efficient programme 224 min at partial load and the "standard 40 degree cotton programme" at partial load in minutes efficient programme 224 min at partial load and 40 °C cotton programme 224 min partial load and 40 °C cotton programme 224 min partial load and 40 °C cotton programme 224 min partial load and 40 °C cotton programme 224 min partial load and 40 °C cotton programme at full load	per year, based on 220 standard washing cycles for cotton programmes at 60 degrees and 40 degrees at full and partial load, and the consumption of the low-power modes.
